

As a christian resident of Phoenix my family and I enjoy listening to K-Love radio daily. This fantastic uplifting station inspires all who listen and is one of only 3 christian stations available in my area. I truly value my ability to listen and would be very upset if the FCC decides to replace the K-love FM signal by an LPFM signal and take away my right to listen to a station I love. K-Love provides a positive impact in this community by supporting wholesome family values, playing great contemporary christian music, and providing information about upcoming community events and concerts. The other stations in the area are not as informative and are harder to tune in. PLEASE do not allow LPFM stations to take priority over the current FM translators and force K-Love off the air. Arizona needs and loves K-Love and our communities will suffer a great loss if they are removed from the FM broadcast signal.
